

#### Value beyond the grid: Sector coupling opportunities for ocean energy technologies

16 October 2019 Halifax, Canada Alessandra Salgado, Associate Programme Officer -Innovation, Quality and Standards (IRENA)

# 1. Tracking R&D and innovation

- Patents (IRENA INSPIRE)
- Project Inventories and data
  - Installed capacity, investments, jobs

# 2. Quality assurance-standards (IRENA INSPIRE)

2. 'State of play' study: Main recommendations for each challenge based on global experiences

#### **Key Recommendations**

#### Technology:

Increase resource assessment campaigns and quality Support test centres Capital grant funding for R&D Include in roadmaps

# Economic: Promote niche markets Quantify additional benefits Innovative financial structures Premium price MWh

#### **Environmental and Social:** Improve access to baseline data

Consult and engage the public early on

# Infrastructure:

Ensure that Network Operators have transparent plans for accommodation of ocean energy technologies

Engage and inform the emerging supply chain

# **Sector coupling opportunities**

# **Sector coupling examples**

5

#### **GEPS Techno (France)**

Electricity Generation for ships + ship stabilisation

#### Resolute Marine Energy, Inc. (Cape Verde)

Desalination and Electricity Production with wave energy

## **OCEAN ENERGY DEPLOYMENT PROGRESS**

2016

# Still a big gap between the LCOE of OET and other RET – after decades of R&D, no economies of scale yet

- » Virgin Islands 0.13 USD/kWh<sup>1</sup>;
- » Hawaii 0.28 USD/kWh<sup>2</sup> ;
- » Caribbean average 0.33 USD/kWh<sup>3</sup>;
- » Federal States of Micronesia 0.48 USD/kWh<sup>4</sup>

<sup>1</sup>https://www.eia.gov/state/print.php?sid=VQ

<sup>2</sup> https://www.hawaiianelectric.com/my-account/rates-and-regulations/average-price-of-electricity

<sup>3</sup> http://www.nrel.gov/docs/fy15osti/62691.pdf

<sup>4</sup> http://www.nrel.gov/docs/fy15osti/64294.pdf

With tidal barrage Without tidal barrage 3.4% 3.8% 0.3% 40.7% OTEC OTEC Wave Wave 55.8% 95.9% Tidal Tidal Ocean energy technology OTEC Tidal Wave

Within each category there are several different technology designs

Innovation is prolific in OET, but would it be time for technology design convergence and harness economies of scale?
