

**For discussion**

- » Is the concept of capacity credit used in your long-term planning process?
- » If so, what is the methodology you use to estimate capacity credit?
- » If you do not currently use capacity credit in your long-term planning for VRE, do you think your energy plan would change if you incorporated it?
- » Do you think you have the data/resources to perform advanced capacity credit estimation?
- » What would you like to improve in the estimation of VRE contribution to generation adequacy?

- » How do you represent power system flexibility in your long-term planning process?
- » Is a flexibility study performed to check long-term capacity results?
- » How could you improve the representation of power system flexibility in your long-term planning process?
- » If you do not currently represent flexibility in your long-term planning for VRE, do you think your plan would change if you incorporated it?
- » Do you think you have the data/resources to perform a flexibility study? What are the barriers?

# Thank you!
